#### 1) Mushroom Production Workshop(26/02/2024)

A one-day workshop on mushroom production at commercial level was organized under the joint aegis of Eco Club and Swami Vivekananda CareerGuidance Cell under the Environment Education Program at Government Graduate College, Timarni. This workshop was attended by staff members andmore than 100 students participated enthusiastically in the program. Expert speaker of the workshop, Anand Verma, Assistant Professor, Harda Degree College, gave information to the students about different species of mushrooms and explained the difference between edible mushrooms and poisonous mushrooms. He said that mushroom products can be started by the industry from a small room, from which good stock can be obtained. Its production can harm the environment in any way. While teaching the students the techniques of mushroom production, he explained the types and practical process of mushrooms produced in the college.

#### 2) Vermi-Composting Workshop(27/02/2024)

A one-day workshop on the subject of vermicomposting was organized under the joint aegis of **Eco Club and Swami Vivekananda Career Guidance Cell.**Expert speaker Chinmoy Gadre told the students that vermicompost is an excellent organic fertilizer which is prepared with the help of earthworms and cow dung. This fertilizer does not allow the environment to get polluted. Nitrogen, phosphorus and potash are found in sufficient quantity in this fertilizer which helps in rapid growth of crops and does not allow the soil to become waste. To make this fertilizer, such materials are used which can easily decompose. Dung of any animal, plant remains, agricultural wastes are used. In the said program, students were given detailed information about the production of vermicompost, its uses and benefits. The practical process of preparing vermicompost pit in the botanical garden was explained.
