The Importance of Analogies and Counterexample in Mathematics	353	20/02/2021

At the beginning of seminar Mr. Sunit Kashiv has given the Introduction of Govt. College Timarni. After this program convener Dr. Neeraj Malviya has given the Introduction of Chief Guest Dr. Geeta Modi (Chairman of Board of Studies of Mathematics in Higher Education Department of Madhya Pradesh), Special Guest Dr. Deepak Singh (HOD, Department of Mathematics, NITTTR) and Special Guest Dr. Geeta Agrawal (Professor of Mathematics, Govt. MVM, Bhopal). After the introduction of Guests, College In charge Principal Dr. J K Jain has welcomed all the Guests and Speakers. Chief Guest Dr. Geeta Modi described importance of analogy in Mathematics and real-life applications of Mathematics. Dr. Geeta said that google meet worked as a closed interval. Dr. Deepak Singh has given various examples of analogy in Engineering subjects, Dr. Geeta Agrawal introduced all the speakers and chaired the session.

The first eminent speaker Dr. Ramakant Bhardwaj explained the need of analogy and said that “An analogy is a literary technique in which two unrelated objects are compared for their shared qualities. Analogies are commonly used to show important comparisons and make solid arguments

Types of Analogy are

(i) Literal Analogy (ii) Figurative Analogy

In a literal analogy, you are saying that one thing really is similar to another. This is the kind of analogy that you would draw if you wanted to make an argument or persuasion. For example, when scientists test a new medicine on laboratory mice, they are arguing that mice and humans really are similar in medically significant ways. Therefore, as the argument goes, if a medicine works on mice, it should also work on humans (or at least it's ready for human testing).

In a Figurative analogy, you're simply drawing a comparison between two unrelated things to highlight a certain characteristic. you're not necessarily saying that the things are truly similar

Dr. Bhardwaj described analogy by various example of Engineering, after it he has define counterexample with many examples of Group theory, Fuzzy set theory and fixed-point theory.

Second eminent speaker Dr. Jerolina Fernandez started their lecture with the statement of Simeon-Denis Poi and said “Life is good for only two things, discovering mathematics and teaching mathematics”. And then defined analogy and said “Analogy is a cognitive process of transferring information or meaning from a particular subject (the analog or source) to another (the target), or a linguistic expression corresponding to such a process”.

In simple words, an analogy is a mapping of knowledge from one domain (the base) into another (the target), which conveys that a system of relations that holds among the base objects also holds among the target objects. And she has explained analogy by the examples of Calculus Analogies, Function Machine Analogy and Composite Function Analogy, After this she has define counterexamples by following

definition “A counterexample is an exception to a proposed general rule or law, and often appears as an example which disproves a universal statement”. She has given various examples of number theory, theory of functions with graphs and real-life problems.

The third eminent speaker Dr. Sarla Chouhan (Assistant Professor of Mathematics, SGSITS Indore) define analogy in following ways “An analogy is something that shows how two things are alike but with ultimate goal of making a point about this comparison.

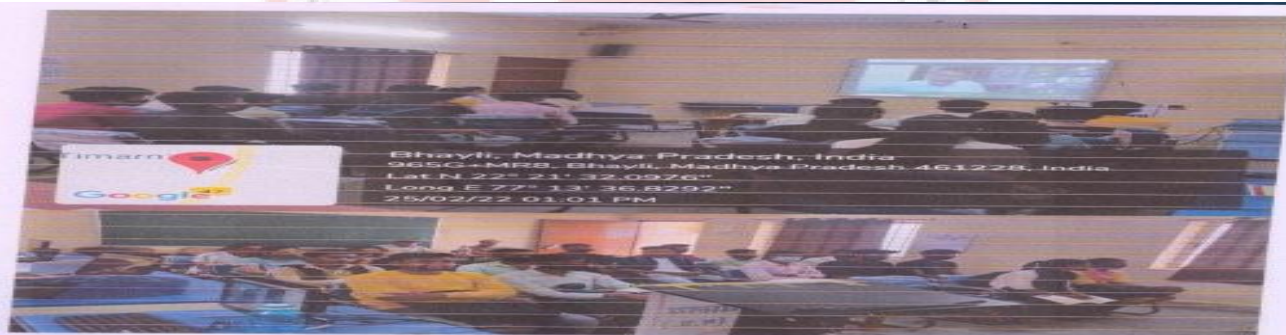

The modern word “analogy” actually comes from the ancient Greek word for “proportionality”. The term analogy can also refer to the relation between the source and the target themselves. Used analogies to directly illustrate similar relationships between two pairs of words, often for the purpose of logical argument, Dr. Chouhan has given various examples from mathematical reasoning and has described the importance of Analogy and said “Analogy plays a significant role in problem solving as well as decision making, argumentation, memory, creativity, prediction, explanation and communication. Analogy is important not only in ordinary language and but also in Science, Philosophy, Law and the Humanities etc. Analogy helps students connect new mathematical knowledge to their experimental knowledge and thus facilitate understanding and memorization of mathematical concepts”. After this “An example that refutes or disproves a hypothesis, proposition or theorem”. “A counter example is a special kind of example that shows that it is false. It is helpful because they make it easier to quickly show certain conjectures or ideas are false” She has given useful examples from Discrete Mathematics using Mathematical Induction.

At the end the program convener Dr. Neeraj Malviya has given vote of thanks to all Guests, Speakers, Participants.

Workshop on Open Book Examination	92	26/02/2021

According to the instructions of the government, under the session 2019-20, the university annual examinations of all the classes of the college are to be conducted through the open book system (in which the students are confirmed) instead of being physically present. . To provide guidelines in this regard, an online workshop is to be organized in the college as per the instructions of the government. In which Dr. in-charge of Chemistry Department of Hoshangabad Home-Science College to provide necessary information related to open book examination. Arun Kumar Sikarwar will attend as the keynote speaker.

Therefore, it is ordered to all the staff of the college, that you should compulsorily be present in the said online workshop and ensure necessary action for the students to participate in this program and provide the link to the students. for information and follow up

Career Path in Sociology	45	27/02/2021

Department of Social Science Government College Timarni, organized a one day seminar on “Career Path in Sociology” held on 26 February 2021, a workshop was organized in the Department of Sociology. Conference start with lamplight in front of Sarasvati mata. After the welcome of guests, conference was starts and during the technical session Dr. Manorama Chouhan said about the different Job opportunity in the field of NGOs and field work. In which, for the students to go in different fields, Prof. from our college for guidance and options. Sanjay Patwa, Mr. Deepak Bibriya, Dr. Neeraj Malviya and other teachers from the Department of Sociology explained to the children in detail their advantages and qualities of success, as well as how we work in the field of research. Dr. Neeraj Malviya discussed in detail about the precautions that have to be taken. Chair of the seminar Dr. J.K. Jain was said to students you may try job in different field but do not loose morals.

Seminar	Participates	Date
e-learning and challenges with solutions	505	06/03/2021

At the beginning of Seminar Mr. Sunit Kashiv has given the introduction of Govt. College, Timarni after this program convener Mr. Pankaj Khairnar has given the introduction of Chief Guest Dr Anuj Hundet (Professor, Department of Physics, IEHE-Bhopal), Special Guest Dr Ravendra Panchbhai (Associate Professor of Mathematics, OSD to Chairman MPPSC, Indore) After the introduction of Guests, College Principal Dr V Raghuvanshi has welcomed all the guests and speakers. Chief guest Dr Anuj Hundat explained the various tools and software of e-learning in detail and talked about using them in maximum quantity. Special guest Dr R. Panchbhai told that we need e-learning in every field and also said that this e-learning should always be used.

The first eminent speaker Dr Amit Sinhal explained the advantages as well as the disadvantages of e-learning in detail and explained in detail how to make e-learning more effective.

Second eminent speaker Dr Sachin Kamlay explains how to convert e-learning into export learning.

The third eminent speaker Dr Rupesh Shukla explained the various uses of e-learning about adopting more and more e-learning in the field of education besides in others fields.

At the end Program Coordinator Mr. Deepak Malakar has given vote of thanks to all guests, speakers and participants.

Space Weather and its Impact on Earth	202	10-03-2021

At the beginning of seminar Mr. Sunit Kashiv has given the Introduction of Govt. College Timarni. After this program convener Mrs. Surabhi Chourey has given the seminar introduction and outline of the program. After that, College Principal Dr. Vineeta Raghuwanshi has welcomed all the Guests and Speakers.

Chief Guest Dr. Alok Rastogi described about the Space Weather that it is a branch of space physics and aeronomy, or helio-physics, concerned with the time varying conditions within the Solar System, including the solar wind, emphasizing the space surrounding the Earth, including conditions in the magnetosphere, ionosphere, thermosphere, and exosphere. He also said that many physical phenomena are associated with space weather.

The First eminent speaker Dr. Ambali KM describe fundamental mechanism of weather. She briefly explained about space weather and solar terrestrial environment. She described about Sun's magnetic field "parker spiral", Solar flare, CME (Coronal Mass Ejections), Aurora. She explained these with a video presentation. "She clears about Impact of Geo Magnetic storms on Radio communication, Navigation, Satellites, communication etc. she gives the details about universal power shutdown in March, 1989. Students very curious to talk with Dr. Ambali and she clear their doubts very nicely.

Second eminent speaker Dr. Amit Jain begins his lecture with Ionospheric irregularities. He explains about Bhopal weather and Polar weather. He also explained the e-density in night & day. He describes about Sky waves that how they come to Earth. He Discussed about the parameter for geomagnetic storms and instruments for ionosphere monitoring. He demonstrates about GPS tracking with the help of live demo test due to GPS Test App. By this he explains the three are more than 24 satellite around the Earth.

The third eminent speaker Dr. Richa Trivedi starts with to understanding what is Solar flare, and increasing ionization due to solar flare and D, E, F1, F2 layers, μ change and Diamond variation. She explains how the analyze the effect of errors on accuracy. and she describe about GPS system error of position error. She tells about the vast research which is going on this field, what are the future on this field and how the student can come to join this field.

At the end the program convener Dr. Mahendra Singh Tadwal has given vote of thanks to all Guests, Speakers. Participants.

Seminar	Participants	Date
Role of Ethnobotany for Personal and Community Wellness	366 366	16-03-2021 16-03-2021

At the beginning Dr. Neeraj Malviya has given the introduction of Govt. College Timarni after this program Convener Dr. Swati Upadhyay has given introduction of the chief guest Dr. K.W. Shah (Chairman of board of studies, Barkatullah University, Bhopal and Dean of Science at Govt. Shahid Bagat Singh College, Pipariya, M.P.) and first eminent speaker Dr. Probodh Shrivastav (Associate Professor Department of Botany, D.S. College Aligarh, U.P.) second speaker Dr. Tarun kumar Thakur (Associate Professor and head Department of Environmental Science of Indra Gandhi National Tribal University, Amarkantak M.P.) and the final speaker is Dr. Ravi Upadhyay (Professor and Head Department of Botany Govt. Shahid Bagat Singh College, Pipariya, M.P.) and enlighten the topic “Role of Ethnobotany for Personal Community and Wellness” given the outline of the Program. After the introduction of Guest, In-charge Principal Mr. Sanjay Kumar Patwa has welcomed all the guest.

The chief guest Dr. K.W. Shah explained the co-relation between humans and the surrounding plants in traditional to modern life. He said that the traditional knowledge also gained by animal by giving some examples and correlate with traditional medicine, Ethnobotany is not only related with plants but also with Gynecology, Dentist, Allopathy, Homeopathy directly to obtain plant product.

The first eminent speaker Dr. Probodh Shrivastav enlighten relation of different plants with our religious culture, Purans from ancients to still know, show different plants form and parts co-related them to different gods and Goddess, and its value and uses in worship, religion, medicine and cosmetics. plants like Areca catechu used in ceremonies, Odorous roots of *Dolomiaea macrocephala* are used in temples. He gave knowledge on Hindu religious months like *Jaistha -Micheliachampaca*, *Ashada-Achryranthesaspera*, *Sravana - Nerium oleander*.

The second speaker Dr. Tarun kumar Thakur delivered a knowledge on traditional medicine and how people directly or indirectly related with it. He explained a brief knowledge on Kamraj (*Cynoglossium lanceolatum*), Jagli Pyaj, Vanjeera, Gulabakawali etc. extracted in lab. and uses in different medicinal field, satellite remote sensing program techniques by provided satellite images of plants and showed knowledge of In-situ and Ex-situ conservation of the forest.

Finally, third eminent speaker Dr. Ravi Upadhyay has shown that how the people of ancient time used the plant in different ways and what role the plants played in today's life. He explained many examples like *Ophioglossum* used in the form of food by Baster tribes, *Boswellia serrata* (salaiguggal) used for cure Arthritis by tribal's but due to lack of traditional knowledge we purchase the tablets for it in a very cost sold by many Indian companies. He remembered how we forgot our traditional culture and knowledge reunite the link of traditional and modern life and harms that we facing today.

An Insight In to COVID-19 Biology -Labs to Clinic	419	22-03-2021

A national seminar was organized on the topic **“An Insight into COVID-19 Biology -Labs to Clinic”** on 22 March 2021 by the Department of Zoology in Government College Timarni. In this seminar, Regional Additional Director of Narmadapuram-Bhopal Division (M.P. Higher Education Department), Dr. Mahendra Singh Raghuvanshi received the chief hospitality and Dr. Prabha Soni, Principal of Swami Vivekananda Postgraduate College attended as a special guest. Program coordinator Mr. Satya Prakash Jadham apprised the guests and participants about the program's outline and introduction. Principal of the College Dr. Vineeta Raghuvanshi welcomed everyone. The keynote speaker of this seminar was Dr. Hamendra Singh Parmar Senior Assistant Professor from Devi Ahilya Vishwavidyalaya Indore, he told what are the methods of virus infection and how it can be treated. Second expert speaker Dr. Hem Chandra Jha (Assistant Professor IIT Indore) explained what are the differences among different mutations of the virus in different countries and what are the different symptoms seen in different mutated virus. IISc and Mynwax company Bangalore's Chief Scientist Dr. Vinita Tiwari joined as third expert speaker, she explained the process of making the vaccines and the method of its working. In-charge of Science Faculty Dr. Neeraj Malviya introduced the chief guest and all the speakers and Mr. Sunit Kashiv introduced the College to everyone. The technical operation of the program was done by Mr. Pankaj Khairnar and at the end of the program secretary Dr. Mahendra Singh Tadwal thanked everyone. Mr. Deepak Malakar and Mr. Abhishek Agarwal played a special role in the successful operation of the program. In this seminar, the participants quenched their curiosity through questions. In this national seminar about four hundred participants joined online from our country as well other countries also.

Seminar	Participates	Date
Application of Mathematics in Computer Science and Real Life	240	25-03-2021

At the beginning of seminar Mr. Sunit Kashiv has given the Introduction of Govt. College Timarni after this Program Convener Dr. Neeraj Malviya has given Introduction of The Chief Guest Dr. Anil Rajput (Chairman of Board of Studies of Mathematics, Barkatullah University), Special Guest Dr. Anil Goyal (Dean of Academic, Department of Mathematics RGPV, UIT), first speaker Dr. Amrish Handa (Assistant Professor of Mathematics Govt. P.G. Arts & Science College Ratlam (M.P.) , second speaker Dr. Santosh Kumar (Associate Professor of Mathematics, College of Natural and Applied Sciences, University of Dar es Salaam, Tanzania.) . After the introduction of Guests. Principal Dr. Vineeta Raghuvanshi has welcomed all Guests. The Chief Guest Dr. Anil Rajut explained the importance of Mathematics in Computer science and in real life, He said that Google search engine works by using page rank algorithm and automatic car also using Mathematical concept. The special guest Dr. Anil Goyal explained the use of Numerical analysis in Computer Science

The first eminent speaker Dr. Amrish Handa (Assistant Professor of Mathematics Govt. P.G.Arts & Science College Ratlam (M.P.) said “Basic arithmetical operation i.e. addition, subtraction, multiplication, division are used in our day to day life. Mostly commercial activities like purchasing & selling of goods, calculating interests or discounts, calculating salaries or payments etc. we deal in our daily life”

The second eminent speaker Dr. Santosh Kumar (Associate Professor of Mathematics, College of Natural and Applied Sciences, University of Dares Salaam, Tanzania.) said “Most students would like to know why they have to study various mathematical concepts. Teachers usually cannot think of a real-life application for most topics or the examples that they have are beyond the level of most students.

When teachers try to convince their students, that mathematics is useful in many professions, such as engineering and medical sciences, many of their students may not be interested in these occupations. The areas in physics like kinematics, mechanics, quantum mechanics, etc. are also a branch of mathematics, not to mention that:

“Mathematics is the queen of all sciences (Reimer & Reimer, 1992, p. 83) A famous quotation by the great Mathematician Carl Gauss (1777-1855).

Dr. Santosh has explained important applications of Mathematics in real life. As follows Applications of Mathematical Knowledge in the Workplace:

What are in the secondary syllabus and textbooks are mostly arithmetical applications such as profit and loss, discount, commission, interest rates, hire purchase, money exchange and taxation. But what about workplace uses of algebra, geometry, trigonometry and calculus? Usually, many of these applications are beyond the level of most students. Thus, I will illustrate some suitable real-life applications which teachers can discuss with their students

Use of Similar Triangles in Radiation Oncology

Geometry plays a very important role in radiation oncology (the study and treatment of tumours) when determining safe level of radiation to be administered to spinal cords of cancer patients (WGBH Educational Foundation, 2002).

Encoding of Computer Data using Large Prime Numbers/ Application of Number Theory and Cryptography Before computer data are sent through the Internet, especially sensitive data like online banking, they are encoded so that hackers cannot make use of the data unless they know how to decode. Ronald Rivest, Adi Shamir and Leonard Adleman have invented the very secure RSA cryptosystem which makes use of very large primes and a complicated number theory. To break the code, hackers need to decompose a very large n into its two very large prime factors

using trial division. Even with fastest computers, this will take years because t

division for very large numbers is an extremely tedious process. The first thing to discuss is how big these primes are? Teachers can introduce to their students the search for very large Mersenne primes. Mersenne (1588-1648) used the formula $M_p = 2^p - 1$, where p is prime, to generate big primes, but M_p is only prime for certain values of p, e.g., M_2 , M_3 , M_5 and M_7 are primes but M_{11} is not a prime. The largest known prime, $M_{43,112,609}$, found by Edson Smith on 23 Aug 2008, contains 12 978 189 digits!

Dr. Kumar explained applications Differential and Computational Geometry, Number Theory, Information theory, Representation Theory, Classical Analysis, Dynamical systems, Spectral theory, Operator Algebras Spectral theory, Operator Algebras Logics Optimization and Control, Operations Research and Optimization, Combinatorics etc. in detail and also summarized all applications in last part of presentation

The Session was ended by the vote of thanks by Mr. Deepak Malakar (Program Coordinator)

SVCG- Short-term training program	100	29 and 30 /06/2021

Under the Vivekananda Career Guidance Scheme, a short-term training program on career guidance was organized online and free of cost on 29th and 30th June from 01:30 to 03:30 pm in Government College Timarni. Which was attended by about 100 students. In the beginning of the program, Dr. Neeraj Malviya, the coordinator of the program apprised the participants about the program outline and brief introduction of the keynote speaker of the first day, Mr. Santosh Kumar Mishra (Assistant Professor M.K.Ponda College of Business and Management Bhopal) to the students. After that the principal of the College Dr. Vineeta Raghuvanshi welcomed the keynote speaker and participants of the program. The Chief Speaker of the first day, Mr. Santosh Kumar explained to the students that it is very important to know one's own interest before deciding on their career. He told that career should be decided keeping in mind the market demand along with own interest. Shri Mishra said that about 90 percent people are not able to work with their full efficiency at the right place and right time due to wrong career selection.

On the second day of the program, Mr. Naveen Gurjar, Senior Manager Corporate (Training and Placement) from SEZ University joined as the keynote speaker. Various details of personality development were explained in detail by Mr. Gurjar to students. Taking simple examples of daily life, guided the students for a high-level career.

The co - coordinator of the program, Mr. Deepak Malakar, thanked the invited keynote speakers. e-certificates were given to all the participants of the program.
